

Keroosen Govender

Software Developer

About Me

My curiosity for technology started the day my dad brought home a Pentium 1 desktop, which ran MS-DOS, and one of the most epic games of the 90s, Duke Nukem. My love for technology has grown from that point on, to become my career passion.

Being a software developer is to be involved in a world that is continuously changing at a rapid speed. This has driven me to want to grow in my knowledge and capabilities within the industry. I strive to create bespoke software for the purpose of adding value to the world around me. My driving force is to use my skill set to make people's lives easier in whatever way I can.

Humility, integrity and the willingness to help others are some of the values I try to add to everything I do.

Work Experience

Full-Stack Developer L1 at Kaleidocode Pivot

February 2017 - Present

I am currently working on ReactJS front-end with interaction IoTs. I have further front-end experience with AngularJS v1.7 and Angular 7 (as used in my personal learning project). I have also worked on ASP.NET projects with a RabbitMQ message bus.

Additional responsibilities: Product presentations to executive management, technical analysis on potential feature work, end-user liaison, coaching apprentices through the KC BootCamp program, participation on the interview panel for potential apprentices.

C++ Tutor at Durban University of Technology

February 2016 - November 2016

Explaining module content, assisting students with queries regarding the module content.

Sales Assistant & Cashier (Part-time) at T K'S Butchery

January 2011 - February 2011

Preparing products, attending to customers' orders, cashier duties.

Education

Degree of Batchelor of Technology in Information Technology from Durban University of Technology:
January 2012 - December 2016

National Senior Certificate from Durban High School
January 2007 - December 2011

Interests

Fishing

This is one of my favourite past times. I have been fishing for many years and have come to have a deep appreciation for the sport and the creatures I catch. I always do my best to practice a catch and release policy, in order to preserve our environment, and also to allow other fishermen to have the experience of catching some of these wonderful creatures.

Church Youth Committee

One of my passions is to help others. Being a part of the youth leadership committee within my church gave me a platform to help the younger generation, through mentorship, teaching, support and fun experiences.

Learning

Growth and learning has always been vital to me. I have embarked on personal learning projects, the latest involving Python, Flask and understanding how to create a CI/CD strategy for the learning project.
